OUR STRATEGIES

COLLABORATION	INNOVATION	BUILD CAPACITY	ADVOCACY
• Embed collaborative mindset across strategic and operational levels within SCS organisations to build sustainability • Integrated service modelling for vulnerable cohorts with multiple touch points across agencies • Increase our understanding of holistic needs for community and employees • High impact collaborations for community benefit which improve the social determinants of health	• Adopting 'place-based' approach, working with our community to adapt to climate change emergency response/s • Community engagement and co-design activity in place-based response plans • SCS engages with other networks, locally and beyond	• Continue to develop and facilitate joint training opportunities, including opportunities to build sector capacity in Shepparton beyond the SCS network • Support effective communities of practice in areas of shared interest including HR, OHS and Quality • Engage with local and regional tertiary education providers to ensure there are a range of employment pathways available to students and graduates	• Promote the advantages of having place-based responses to community issues • Advocate for our community residents to improve quality of life via effective policy, funding or grants • Promote Shepparton Community Share as a trusted partner to help solve community service concerns • Promote our partnership and outcomes which help improve the lives of others
